# SYSTEM DATA SHEET Sikafloor<sup>®</sup> MultiDur EB-24 ECC

## BROADCAST UNICOLOUR EPOXY FLOOR COVERING OVER EPOXY HYBRID SCREED

#### DESCRIPTION

Sikafloor<sup>®</sup> MultiDur EB-24 ECC is an epoxy antislip system for industrial floors on damp substrates.

#### USES

Sikafloor<sup>®</sup> MultiDur EB-24 ECC may only be used by experienced professionals.

For industrial floors subject to medium and heavy traffic, such as warehouses, storage areas, maintenance workshops, car parks and laboratories.

## **CHARACTERISTICS / ADVANTAGES**

- High wear resistance
- High mechanical resistance
- Good chemical resistance
- Medium thermal shock resistance
- Slip resistant
- Fast and easy application
- Thermal expansion properties similar to concrete
- Excellent bond to green or hardened concrete whether damp or dry
- Excellent early and final mechanical strengths
- Excellent resistance to water and oils
- For internal use
- Contains no solvents
- Will not corrode reinforcement steel

## **APPROVALS / CERTIFICATES**

Coating for concrete protection according to EN 1504-2:2004 and provided with the CE-marking

- Sika<sup>®</sup> Method Statement Evaluation and Preparation of Surfaces for Flooring systems

## IMPORTANT CONSIDERATIONS

Always ensure good ventilation when using Sika-

**BUILDING TRUST** 

floor<sup>®</sup> MultiDur EB-24 ECC in a confined space to remove excess moisture.

- Freshly applied Sikafloor<sup>®</sup> MultiDur EB-24 ECC must be protected from damp, condensation and water for at least 24 hours.
- Prevent premature drying by protecting from strong wind and do not expose to direct sun light while fresh.
- Applications under extreme conditions (high temperature and low humidity) which can cause fast drying of the products must be avoided as the product does not allow the use of curing compounds.
- Static cracks: Prefill and level with Sikadur<sup>®</sup> or Sikafloor<sup>®</sup> epoxy resin.
- Dynamic cracks (> 0.4 mm): To be assessed on site and if necessary apply a stripe coat of elastomeric material or design as a movement joint.

## **BASIS OF PRODUCT DATA**

All technical data stated in this Product Data Sheet are based on laboratory tests. Actual measured data may vary due to circumstances beyond our control.

## LOCAL RESTRICTIONS

Please note that as a result of specific local regulations the performance of this product may vary from country to country. Please consult the local Product Data Sheet for the exact description of the application fields.

## ECOLOGY, HEALTH AND SAFETY

For information and advice on the safe handling, storage and disposal of chemical products, users shall refer to the most recent Safety Data Sheet (SDS) containing physical, ecological, toxicological and other safety-related data.

## LEGAL NOTES

The information, and, in particular, the recommendations relating to the application and end-use of Sika products, are given in good faith based on Sika's current knowledge and experience of the products when properly stored, handled and applied under normal conditions in accordance with Sika's recommendations. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written recommendations, or from any other advice offered. The user of the product must test the product's suitability for the intended application and purpose. Sika reserves the right to change the properties of its products. The proprietary rights of third parties must be observed. All orders are accepted subject to our current terms of sale and delivery. Users must always refer to the most recent issue of the local Product Data Sheet for the product concerned, copies of which will be supplied on request.
