PRODUCT DATA SHEET SikaHyflex®-300 EU

WEATHER SEALANT FOR GLASS AND METAL FACADES

DESCRIPTION

SikaHyflex[®]-300 EU is a 1-component, moisture curing, low-modulus elastic weather sealant.

USES

SikaHyflex[®]-300 EU is designed for weather proofing and sealing applications where the sealants' appearance is of importance (translucent/metallic look). SikaHyflex[®]-300 EU is particularly suited as a sealant for shop front, glass partition walls and other applications.

CHARACTERISTICS / ADVANTAGES

- Movement capability of ±25 % (ASTM C 719)
- Very good workability
- Transparent, metallic look
- Solvent-free
- Neutral cure

SUSTAINABILITY

- LEED[®] EQc 4.1
- SCAQMD, Rule 1168
- BAAQMD, Reg. 8, Rule 51

APPROVALS / CERTIFICATES

- EN 15651-1 F EXT-INT CC 25 LM
- EN 15651-2 G CC 25 LM
- ASTM C 920, class 25
- ISO 11600 F 25 LM & G 25 LM

PRODUCT INFORMATION

Composition	Neutral cure silicone			
Packaging	300 ml cartridge, 25 cartridges per box	300 ml cartridge, 25 cartridges per box		
Colour	Transparent			
Shelf life	SikaHyflex [®] -300 EU has a shelf life of 12 months for cartridges and 15 months for foil packs from the date of production, if it is stored in undamaged, original, sealed packaging, and if the storage conditions are met.			
Storage conditions	SikaHyflex [®] -300 EU shall be stored in dry conditions, where it is protected from direct sunlight and at temperatures between +5 °C and +25 °C.			
Density	~ 1.05 kg/l	(ISO 1183-1)		

Product Data Sheet SikaHyflex®-300 EU July 2016, Version 01.01 02051103000000045

TECHNICAL INFORMATION

Shore A Hardness	~ 20 (after 28 days)	(ISO 8	
Secant Tensile Modulus	~ 0.30 N/mm ² at 100% el ~ 0.30 N/mm ² at 100% el		
Elongation at Break	~ 600%	(ISO	
Elastic Recovery	~ 90%	(ISO 73	
Tear Propagation Resistance	~ 3.5 N/mm	(ISO	
Movement Capability	± 25% ±25%	(ISO 90 (ASTM C 7	
Service Temperature	–40 °C to +150 °C		
Joint Design	the movement capability and ≤ 30 mm. The joint di- depth ratio of 2:1 must be Typical joint dimensions Joint Width [mm] 10 15 20 30 All joints must be correct the relevant standards, b of the necessary joint wid the technical values of th material, as well as the sp	designed to suit the joint movement required ar of the sealant. The joint width shall be ≥ 6 mm epth shall be ≥ 6 mm and ≤ 15 mm. A width to e maintained (for exceptions, see table below).	
SYSTEMS			
Compatibility	SikaHyflex [®] -300 EU is compatible with most SikaHyflex [®] and Sikasil [®] silic- one weather sealants, Sikasil [®] SG adhesives and Sikasil [®] IG sealants. All other sealants and adhesives have to be approved by Sika before using them in direct contact with SikaHyflex [®] -300 EU. Where two or more different reactive sealants and/or adhesives are used, allow the first one to cure completely before applying the next one. For specific information regarding compatibility contact Sika technical service.		

APPLICATION INFORMATION

Consumption	Joint length [m] per 300 ml cartridge	Joint width [mm]	Joint depth [mm]	
	5	10	6	
	2.5	15	8	
	1.5	20	10	
	1	25	12	
	0.65	30	15	
Backing Material	Use closed cell, polyethylene foam backing rods.			
Sag Flow	~ 2 mm (20 mm profile, 50 °C) (ISO 7390			
Ambient Air Temperature	+5 °C to +40 °C, min. 3 °C above dew point temperature			
Substrate Temperature	+5 °C to +40 °C			
Curing Rate	~ 2 mm/24 hours (23 °C / 50% r.h.)		(CQP 049-2)

APPLICATION INSTRUCTIONS

SUBSTRATE PREPARATION

The substrate must be clean, dry, sound and homogeneous, free from oils, grease, dust and loose or friable particles. The following priming and/or pre-treatment procedures shall be followed:

Non-porous substrates

Float glass, coated glass, anodised aluminium and stainless steel have to be pre-treated using Sika® Aktivator-205, Sika® Aktivator-100 or Sika® Cleaner P. Powder coated and PVDF coated metals have to be pre-treated using Sika® Aktivator-205. For details like application and flash-off times refer to the most recent PDS of the respective pre-treatment product.

Porous substrates

Concrete, aerated concrete and cement based renders, mortars and bricks shall be primed using Sika® Primer-3 N or Sika® Primer-210. For details like application and flash-off times refer to the most recent PDS of the respective pre-treatment product.

Adhesion tests on project specific substrates must be performed prior to application. For more detailed advice and instructions please contact Sika technical service. Note: Primers are adhesion promoters. They are neither a substitute for the correct cleaning of a surface, nor do they improve the strength of the surface significantly.

APPLICATION METHOD / TOOLS

SikaHyflex[®]-300 EU is supplied ready to use. After the necessary substrate preparation, insert a suitable backing rod to the required depth and apply pre-treatment if necessary. Insert a foil pack or cartridge into the sealant gun and extrude SikaHyflex[®]-300 EU into the joint making sure that it comes into full contact with the sides of the joint and avoids any air entrapment. SikaHyflex[®]-300 EU sealant must be firmly tooled against the joint sides to ensure adequate adhesion.

It is recommended to use masking tape where exact joint lines or neat lines are required. Remove the tape within the skin time.

CLEANING OF EQUIPMENT

Clean all tools and application equipment immediately after use with Sika® Remover-208 and/or Sika® Top-Clean T. Once cured, residual material can only be removed mechanically.

FURTHER INFORMATION

IMPORTANT CONSIDERATIONS

- SikaHyflex[®]-300 EU cannot be overpainted.
- Colour variations may occur due to exposure to chemicals, high temperatures and/or UV-radiation (especially with the colour white). However, a change in colour is purely of aesthetic nature and does not adversely influence the technical performance or durability of the product.
- Do not use SikaHyflex[®]-300 EU on natural stone.
- Do not use SikaHyflex[®]-300 EU on bituminous substrates, natural rubber, EPDM rubber or on any building materials which might bleed oils, plasticizers or solvents that could attack the sealant.
- Do not use SikaHyflex[®]-300 EU on pre-stressed polyacrylate and polycarbonate as it may cause environmental stress cracking (crazing).
- Do not use SikaHyflex[®]-300 EU to seal joints in and around swimming pools.
- Do not use SikaHyflex[®]-300 EU for joints under water pressure or for permanent water immersion.
- Do not expose uncured SikaHyflex[®]-300 EU to alcohol containing products as this may interfere with the curing reaction.

BASIS OF PRODUCT DATA

All technical data stated in this Product Data Sheet are based on laboratory tests. Actual measured data may vary due to circumstances beyond our control.

LOCAL RESTRICTIONS

Please note that as a result of specific local regulations the performance of this product may vary from country to country. Please consult the local Product Data Sheet for the exact description of the application fields.

ECOLOGY, HEALTH AND SAFETY

For information and advice on the safe handling, storage and disposal of chemical products, users shall refer to the most recent Safety Data Sheet (SDS) containing physical, ecological, toxicological and other safety-related data.
